PROFILE

1st-year Master's student in Data Engineering & AI at Paris Ynov Campus, looking for a **3-month Data internship starting May 2027** (Data Engineering, Data Analytics, AI / Machine Learning) in any industry. I build reliable, automated data pipelines (Python, SQL, PostgreSQL, CI/CD) and use them for analytics and AI use cases (Random Forest, KMeans, statistical analysis, Power BI). First experience in a regulated banking environment (Bank Al-Maghrib, Morocco's central bank), where data quality, traceability and reliability are critical. Rigorous, autonomous and comfortable working in Scrum teams.

TECHNICAL SKILLS

- **Data Engineering & Dev:** Python, SQL, PostgreSQL, ETL / data pipelines, FastAPI, Object-Oriented Programming
- **Data quality & governance:** schema validation, quality checks, RBAC, audit logging, data lineage
- **Data Science & ML:** Pandas, NumPy, SciPy, scikit-learn (Random Forest, KMeans), statistical tests (Student's t, Chi-squared)
- **BI & Visualization:** Power BI, DAX, star schema modeling, Matplotlib, Seaborn, Grafana
- **Databases:** SQL (PostgreSQL) and NoSQL (MongoDB, Cassandra, Neo4j, Redis)
- **DevOps & tools:** Git / GitHub Actions (CI/CD), Docker, Linux, Bash, Jira, Confluence, Prometheus
- **Languages:** Arabic (native), French (fluent), English (conversational)

KEY PROJECTS

Data Ingestion Engine (Python) — ETL pipeline & data quality *2026*
- ETL pipeline parsing heterogeneous files (XML, JSON, CSV), with schema validation, quality checks and loading into PostgreSQL.

HARI – AI-powered HR platform — 48h YDays Challenge *2026*
- Team of 10 in Scrum (Git, Jira, CI/CD). Data role: HR data model and analytics KPIs (absenteeism, turnover) for a secure platform (RBAC, audit log).

RENEW – Smart Building — Data Engineering & AI *2026*
- Structuring and cleaning BIM data, digital inventory of building materials and contribution to AI classification solutions.

EduTrack Analytics – Student performance analysis — Data & ML *2025*
- ETL pipeline (CSV/Excel into an 8-table relational database, validation, cleaning), KPIs on 300 students, at-risk profile detection (Random Forest), KMeans segmentation, FastAPI + React API.

Power BI Dashboard – Sales analysis — BI & DAX *2025*
- Star schema (Sales, Customers, Products, Regions, Time) built from CSV, DAX measures and interactive dashboard: 732K revenue, 500 sales, Casablanca ≈ 33% of revenue.

SpotifYnov – Polyglot persistence architecture *2025*
- Multi-database backend: MongoDB (metadata), Cassandra (time series), Redis (cache), Neo4j (recommendations).

E-commerce SLA analysis — Statistics *2024*
- Statistical analysis of 500 samples (Student's t, Chi-squared) to identify server bottlenecks.

PROFESSIONAL EXPERIENCE

Technical Advisor (part-time) — Foundever, Rabat *Jan 2023 – Sep 2026*
- Resolved complex IT incidents for business accounts; tracked and analyzed incidents and performance indicators with Power BI (reporting).
- Worked with cross-functional teams to improve incident response procedures.

Data & Development Intern — Bank Al-Maghrib (BAM), Rabat *Jul – Aug 2022*
- Contributed to the functional analysis of strategic banking projects and digital initiatives.
- Cleaned, structured and qualified data for internal reporting, with rigor and reliability in a regulated environment.

Maintenance Digitalization Intern — Lear Corporation, Kénitra *Sep 2022*
- Moved inventory and industrial maintenance tracking from paper to a structured digital log.

EDUCATION

Master's in AI & Data Engineering (1st year, in progress) — Paris Ynov Campus *2026 – 2028*

Bachelor's, AI Development & Data Engineering — Ynov Campus Casablanca *2024 – 2026*

DEUG (2-year university degree), Mathematics & Computer Science — Ibn Tofail University *2021*

Baccalaureate, Mathematical Sciences A — Abdelmalek Essaâdi High School *2018*

ADDITIONAL INFORMATION

- **Soft skills:** complex problem solving, quick adaptability, communication, scientific rigor, reliability.
- **Interests:** travel, digital graphic design, classic literature, cybersecurity watch.
